

We may well be the coolest robotics company you've never heard of!

Honeybee Robotics is seeking a **Principal Engineer** for our Longmont, CO facility

Position Summary:

Lead development and verification of custom mechanisms and electromechanical subsystems for spaceflight applications.

Responsibilities:

- Understand the voice of the customer and continually inject that vision into the product development effort
- Develop conceptual designs and work plans for new product development including estimation of resources required
- Perform top level architectural design and preliminary analysis/sizing of spaceflight electromechanical hardware
- Act as the primary interface between mechanical and electrical engineering teams
- Analyze and define product functional requirements
- Analyze and define subsystem requirements including: mechanical, electronic, embedded systems and software, etc.
- Own product functional and validation requirements
- Perform hazards/risk analysis and develop mitigation strategies
- Apply engineering principles to, and directly participate in, the design, fabrication, assembly, and test of various mechatronic systems
- Generate and review fabrication, test, and quality assurance documentation and vendor specifications

Required Experience, Skills and Education:

- US Person (US Citizen or Permanent Resident)
- BS in Mechanical, Electrical, Aeronautical Engineering, or equivalent
- 7+ years of post-grad experience developing custom mechatronic products
- 3+ years of product development team leadership experience
- Experience with rapid prototyping methods including hardware & software for fast proof-of-concept development
- Experience writing and maintaining design and test quality assurance documentation
- Demonstrable hands-on experience with all phases of development including requirements analysis, prototype design, product design, assembly, debug, and testing
- Expert in CAD (e.g. Solidworks or equivalent)
- Excellent intra-team and client-facing collaboration and communication skills

TO APPLY: Visit our career site at <https://www.honeybeerobotics.com/about-us/careers/> or send your resume directly to jobs@honeybeerobotics.com and reference job number **F36** in the subject line.

We offer excellent benefits, including; medical, dental, vision; life insurance; STD and LTD insurance; FSA/HSA, 401(k), paid holidays, vacation pay, sick leave, and tuition reimbursement.

Honeybee Robotics creates specialty robots, electromechanical flight subsystems, automated drills and other machines destined for work on Earth, Mars and beyond. We make next-generation applications a reality through creative, collaborative engineering that combines the best minds with innovative technology.

Since 1983, we have completed more than 300 advanced projects for NASA, the US Department of Defense, academia and industry. Every Martian rover since 2003, has relied on systems built by Honeybee Robotics. Our passion for the planet continues as we work on future systems for Mars, planetary moons and asteroids.
